

Payment and savings accounts

Interest rates are set as a percentage of the reference interest rate.

If the reference rate is negative, it is considered to be 0.00%, whereby the interest rate is determined as an added margin expressed in percentage points above the reference interest rate.

OTHER SIGHT DEPOSITS

The basic interest rate for savings products is determined as a percentage of the reference interest rate. If the reference rate is negative, it is considered to be 0.00%, whereby the basic interest rate is determined as an added margin expressed in percentage points above the reference interest rate. The incentive increases for higher amounts are expressed as an added bonus margin expressed in percentage points above the base rate for the respective product.

Incentive increases above the basic interest rate for the respective product are adjusted according to the dynamics for determining variable interest rates.
